To use the absolute reference with columns or rows, we use:

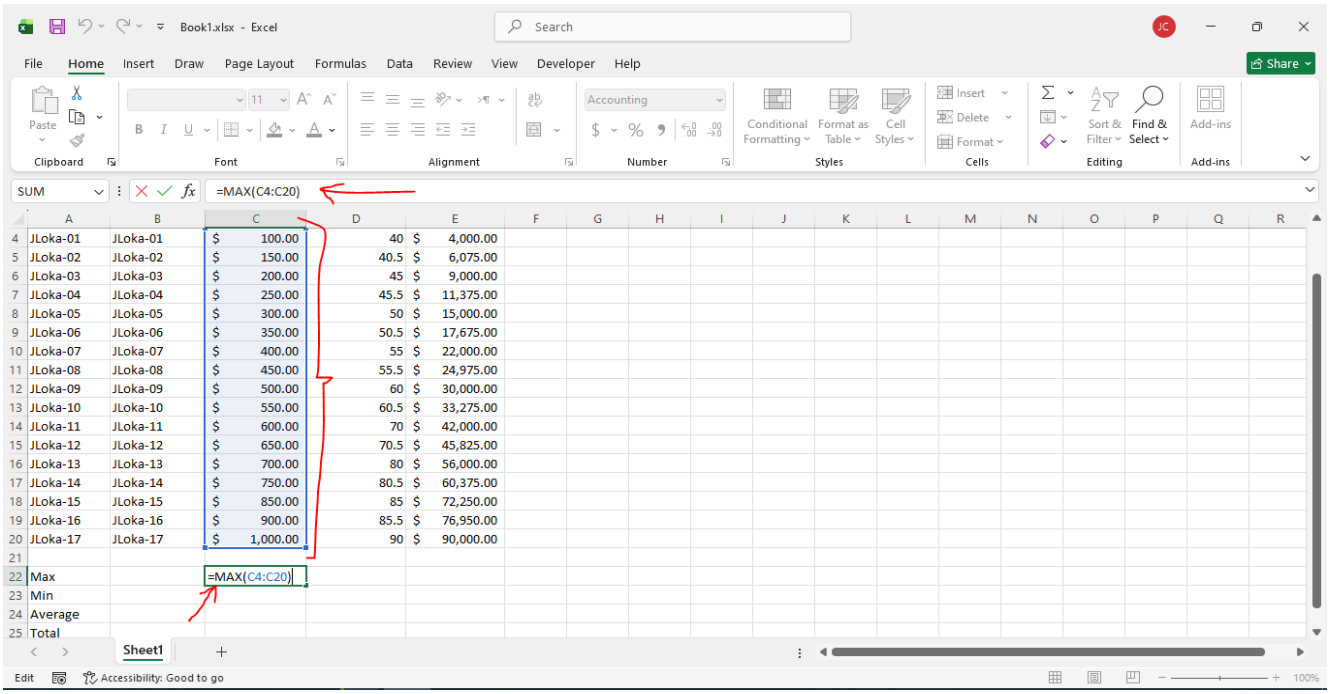

==========

To apply the mathematical operation to date cells:

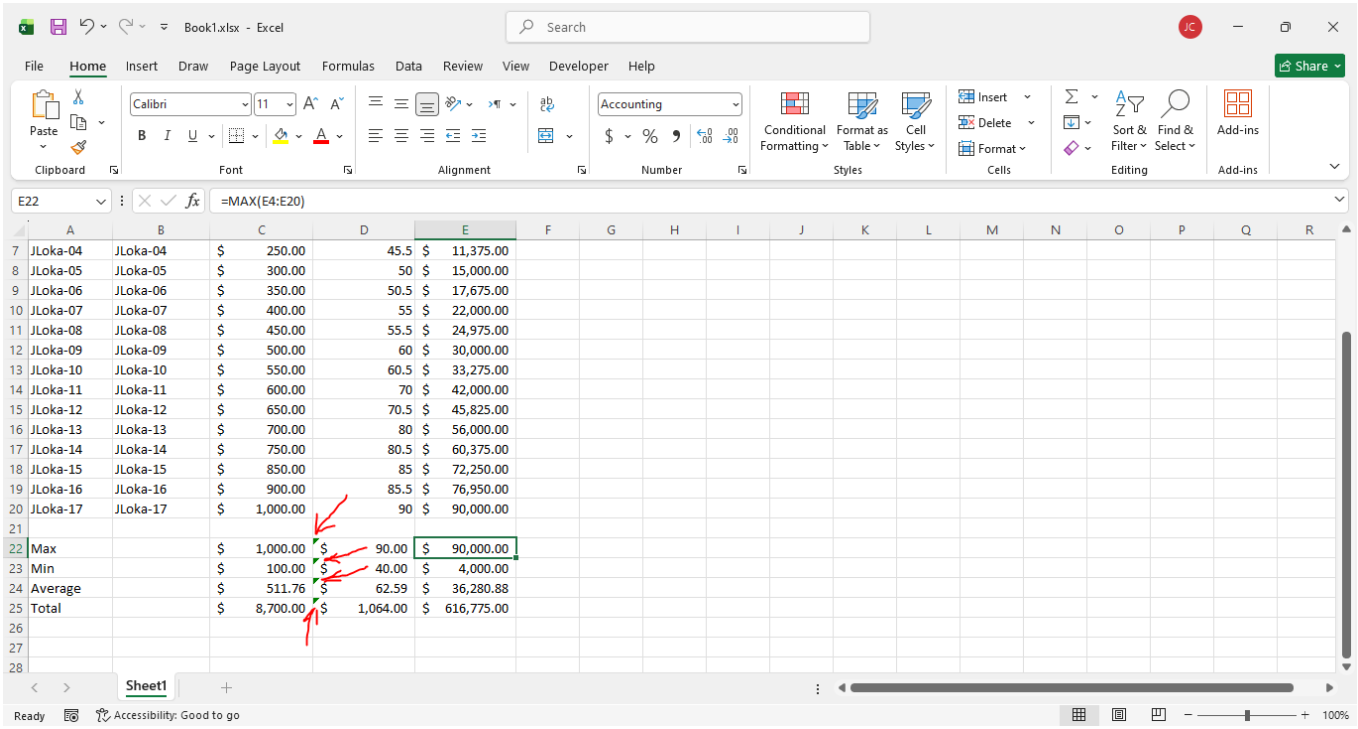

==========

To find the max in the cell:

==========

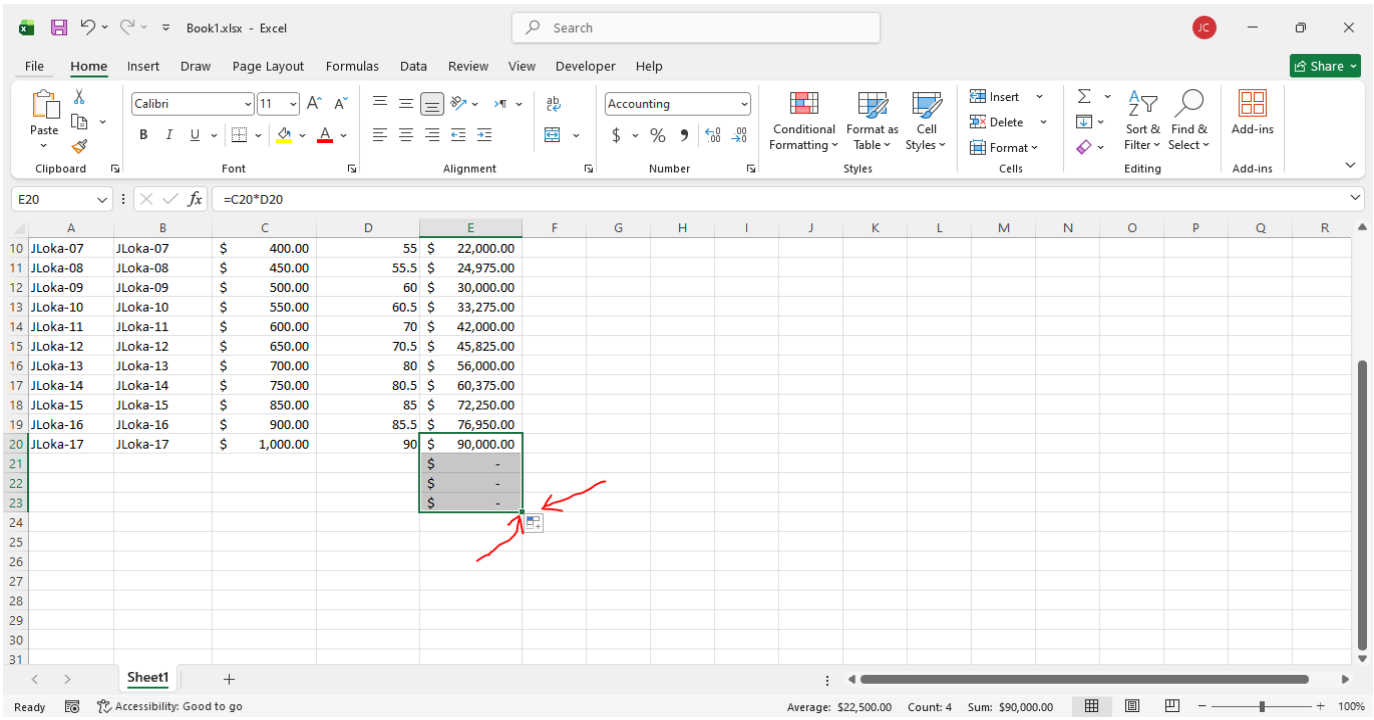

The same issue applies to other formulas to use: **min**, **max**, **avg**, and **sum.**

	A	B	C	D	E
7	JLoka-04	JLoka-04	$ 250.00	45.5	$ 11,375.00
8	JLoka-05	JLoka-05	$ 300.00	50	$ 15,000.00
9	JLoka-06	JLoka-06	$ 350.00	50.5	$ 17,675.00
10	JLoka-07	JLoka-07	$ 400.00	55	$ 22,000.00
11	JLoka-08	JLoka-08	$ 450.00	55.5	$ 24,975.00
12	JLoka-09	JLoka-09	$ 500.00	60	$ 30,000.00
13	JLoka-10	JLoka-10	$ 550.00	60.5	$ 33,275.00
14	JLoka-11	JLoka-11	$ 600.00	70	$ 42,000.00
15	JLoka-12	JLoka-12	$ 650.00	70.5	$ 45,825.00
16	JLoka-13	JLoka-13	$ 700.00	80	$ 56,000.00
17	JLoka-14	JLoka-14	$ 750.00	80.5	$ 60,375.00
18	JLoka-15	JLoka-15	$ 850.00	85	$ 72,250.00
19	JLoka-16	JLoka-16	$ 900.00	85.5	$ 76,950.00
20	JLoka-17	JLoka-17	$ 1,000.00	90	$ 90,000.00
21					
22	Max		$ 1,000.00	$ 90.00	$ 90,000.00
23	Min		$ 100.00	$ 40.00	$ 4,000.00
24	Average		$ 511.76	$ 62.59	$ 36,280.88
25	Total		$ 8,700.00	$ 1,064.00	$ 616,775.00
26					
27					
28					

==========

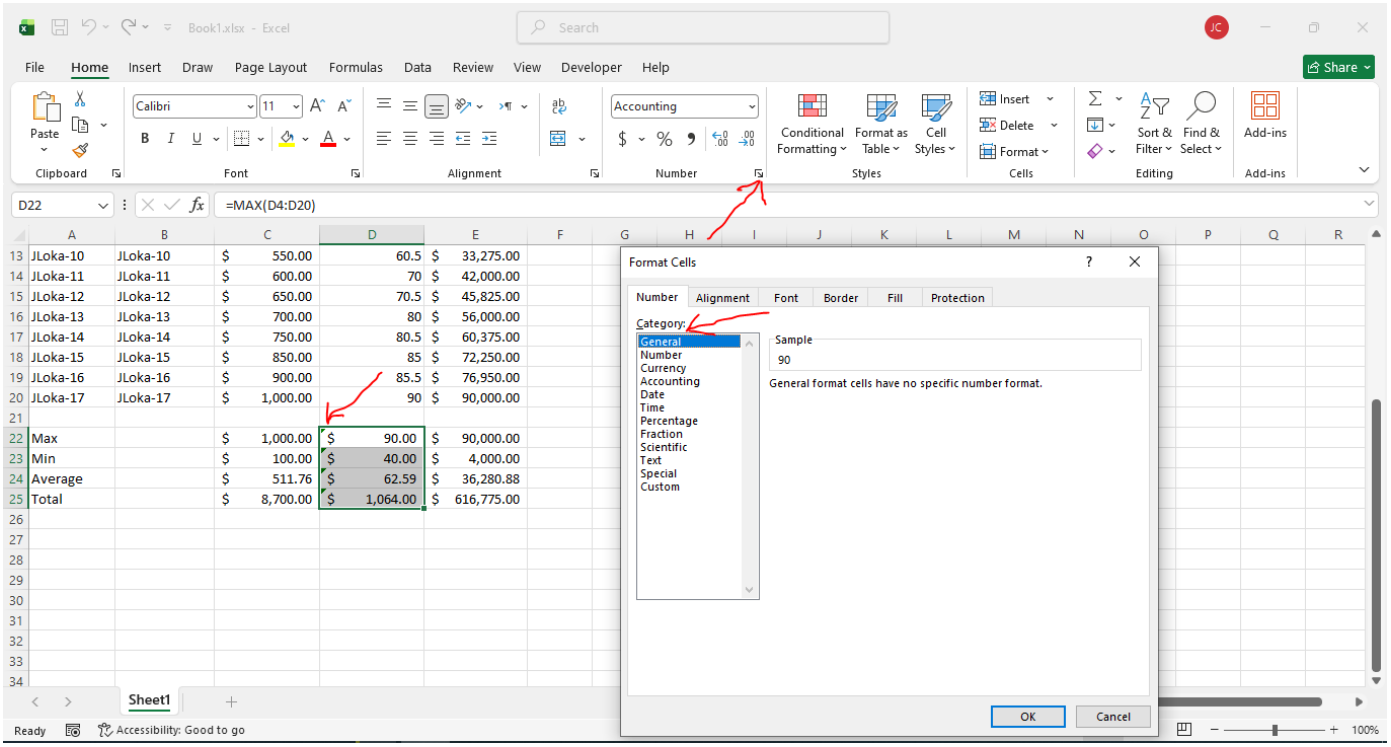

We can apply the formula using the rectangle of the cell:

	A	B	C	D	E
10	JLoka-07	JLoka-07	$ 400.00	55	$ 22,000.00
11	JLoka-08	JLoka-08	$ 450.00	55.5	$ 24,975.00
12	JLoka-09	JLoka-09	$ 500.00	60	$ 30,000.00
13	JLoka-10	JLoka-10	$ 550.00	60.5	$ 33,275.00
14	JLoka-11	JLoka-11	$ 600.00	70	$ 42,000.00
15	JLoka-12	JLoka-12	$ 650.00	70.5	$ 45,825.00
16	JLoka-13	JLoka-13	$ 700.00	80	$ 56,000.00
17	JLoka-14	JLoka-14	$ 750.00	80.5	$ 60,375.00
18	JLoka-15	JLoka-15	$ 850.00	85	$ 72,250.00
19	JLoka-16	JLoka-16	$ 900.00	85.5	$ 76,950.00
20	JLoka-17	JLoka-17	$ 1,000.00	90	$ 90,000.00

==========

To apply the format to the cell:

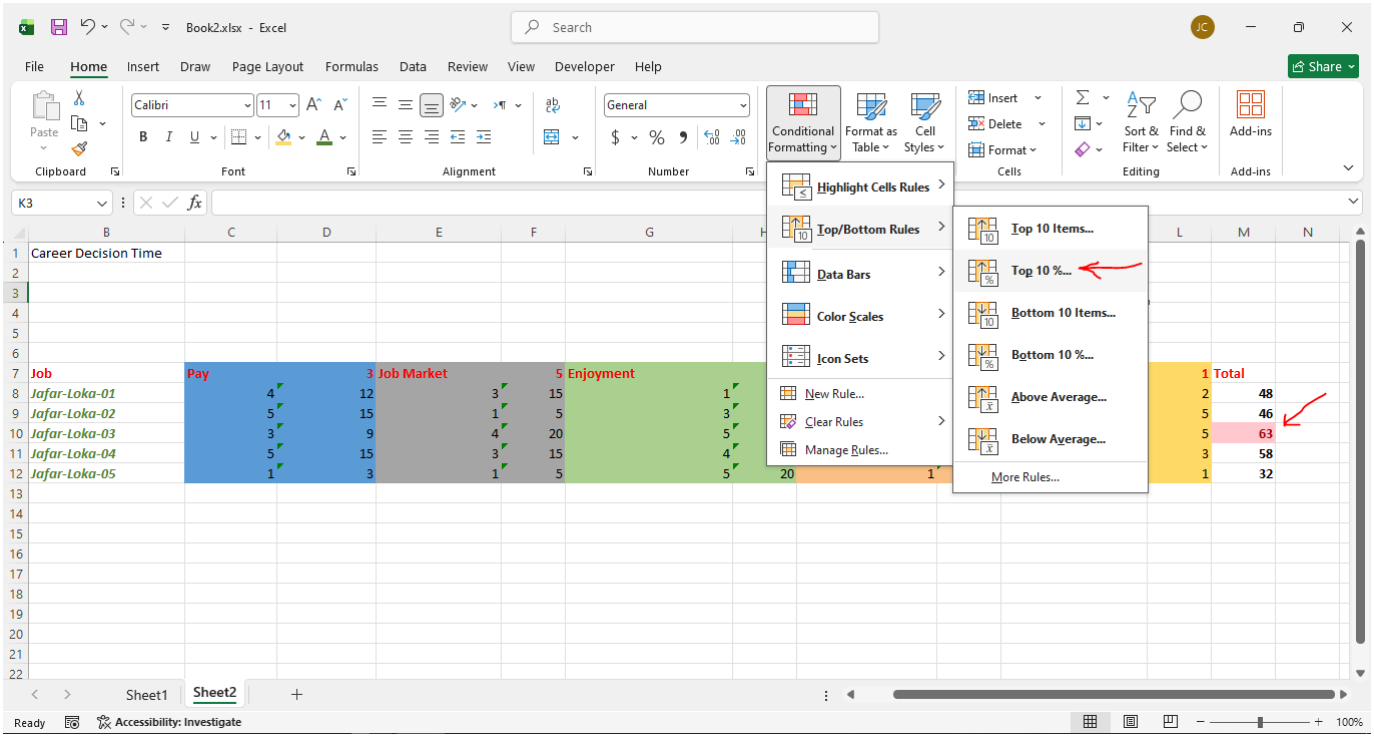

==========

To use conditional formatting with its formulas:

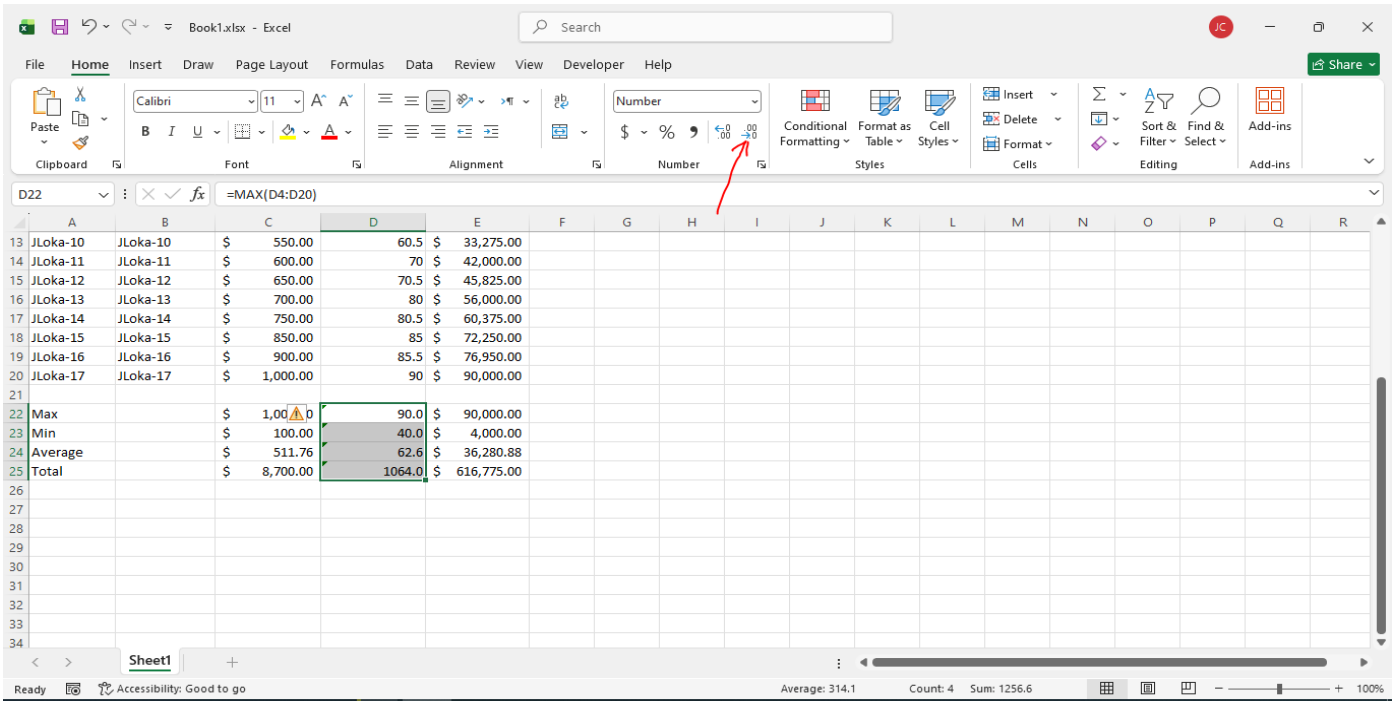

==========

To create a conditional formatting using the Top 10%:

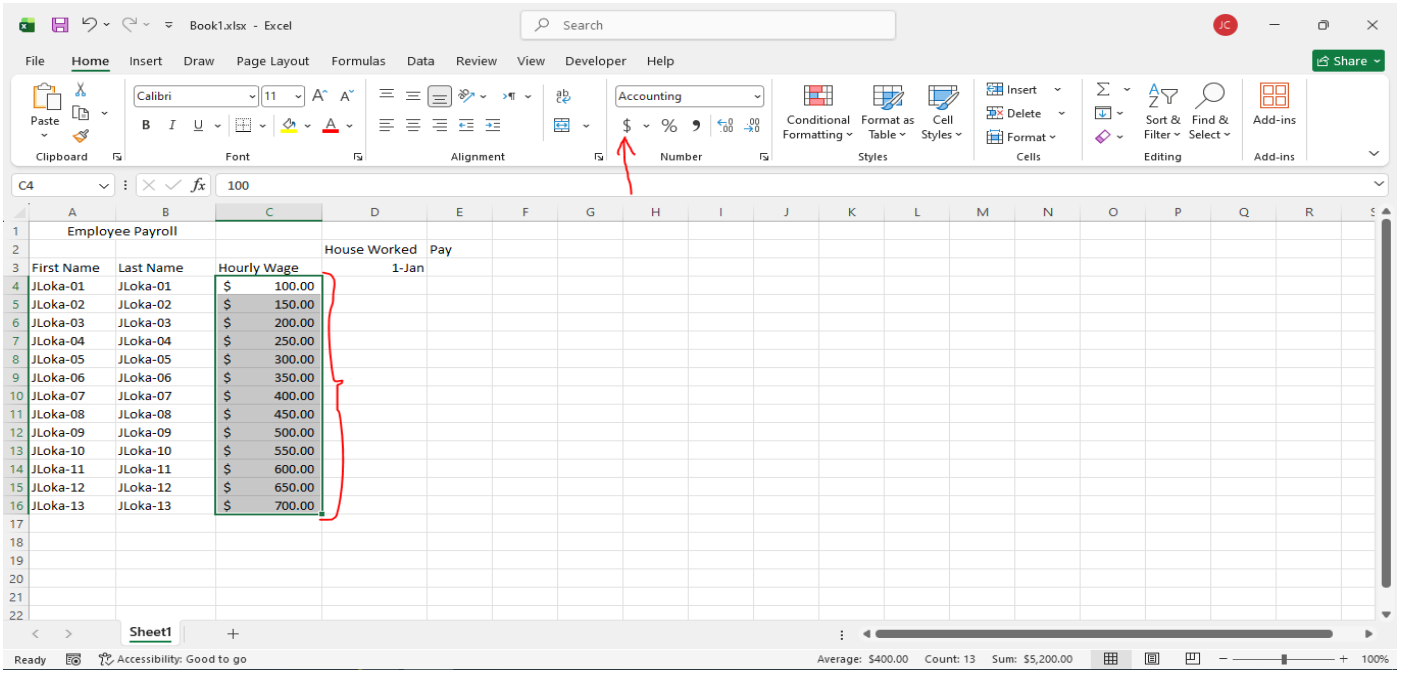

==========

To increase or decrease the decimal point of a number:

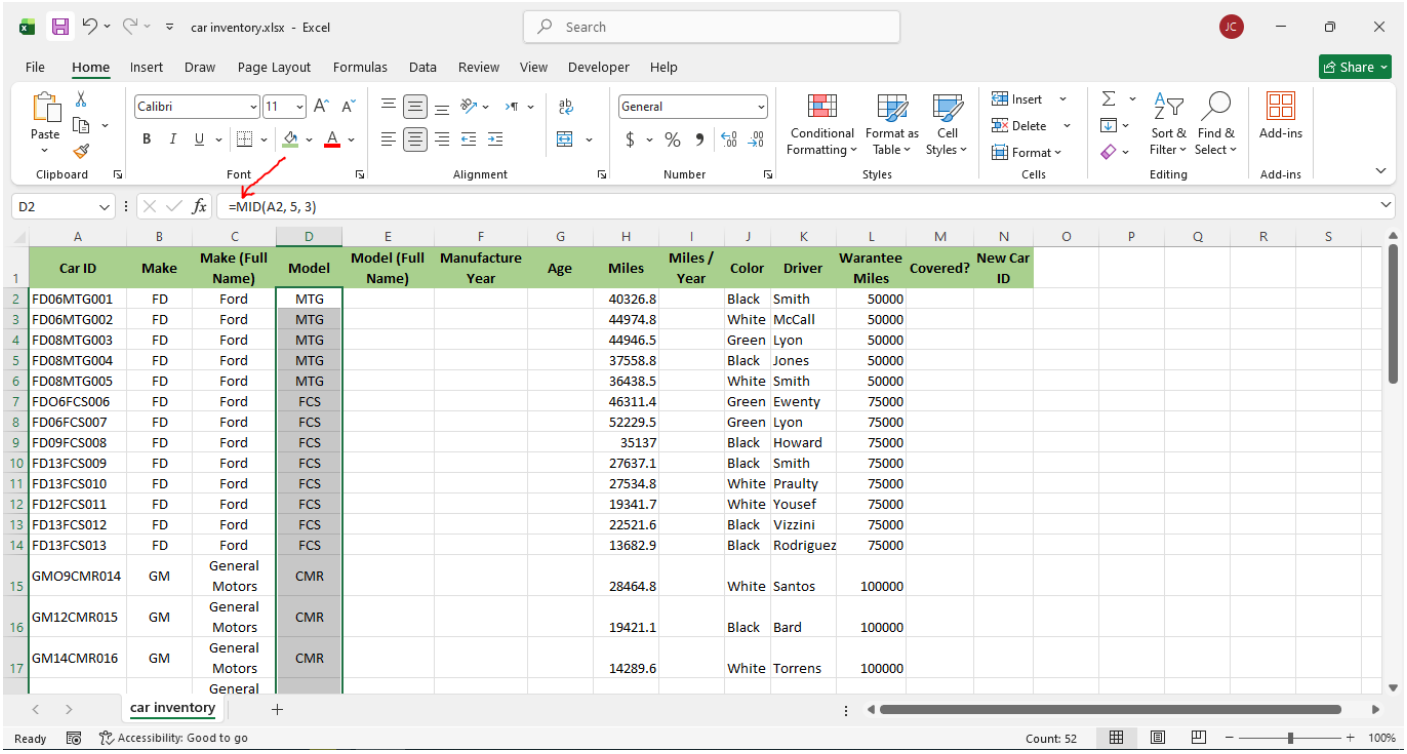

==========

To use the currency formatting:

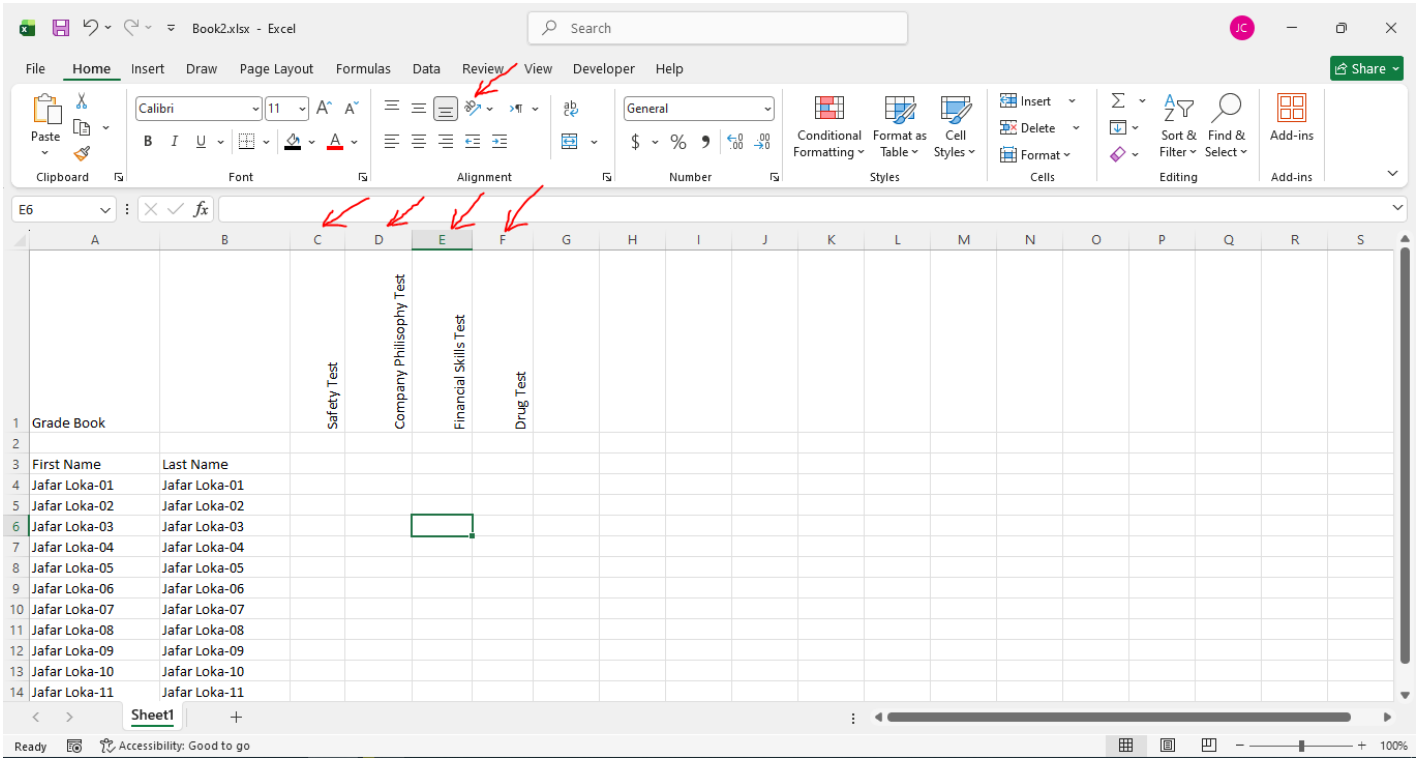

==========

Getting the data using the MID function:

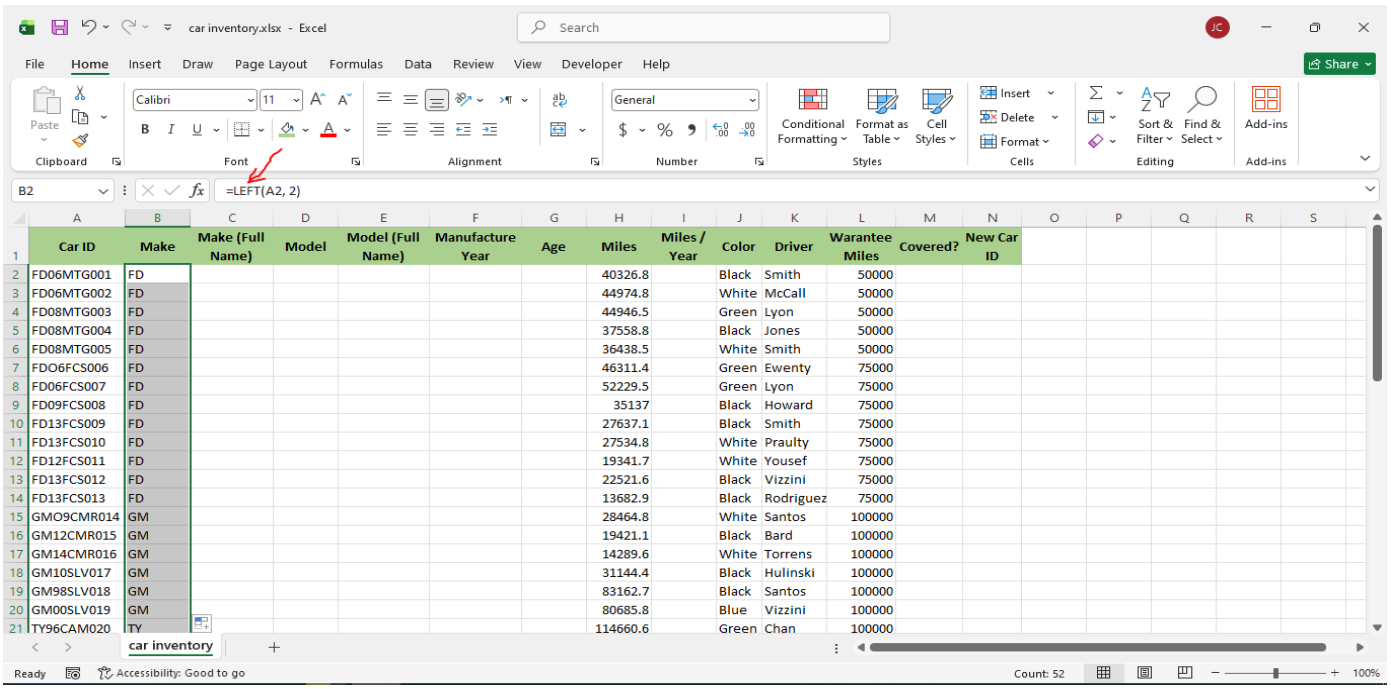

==========

To rotate the column values, we can use:

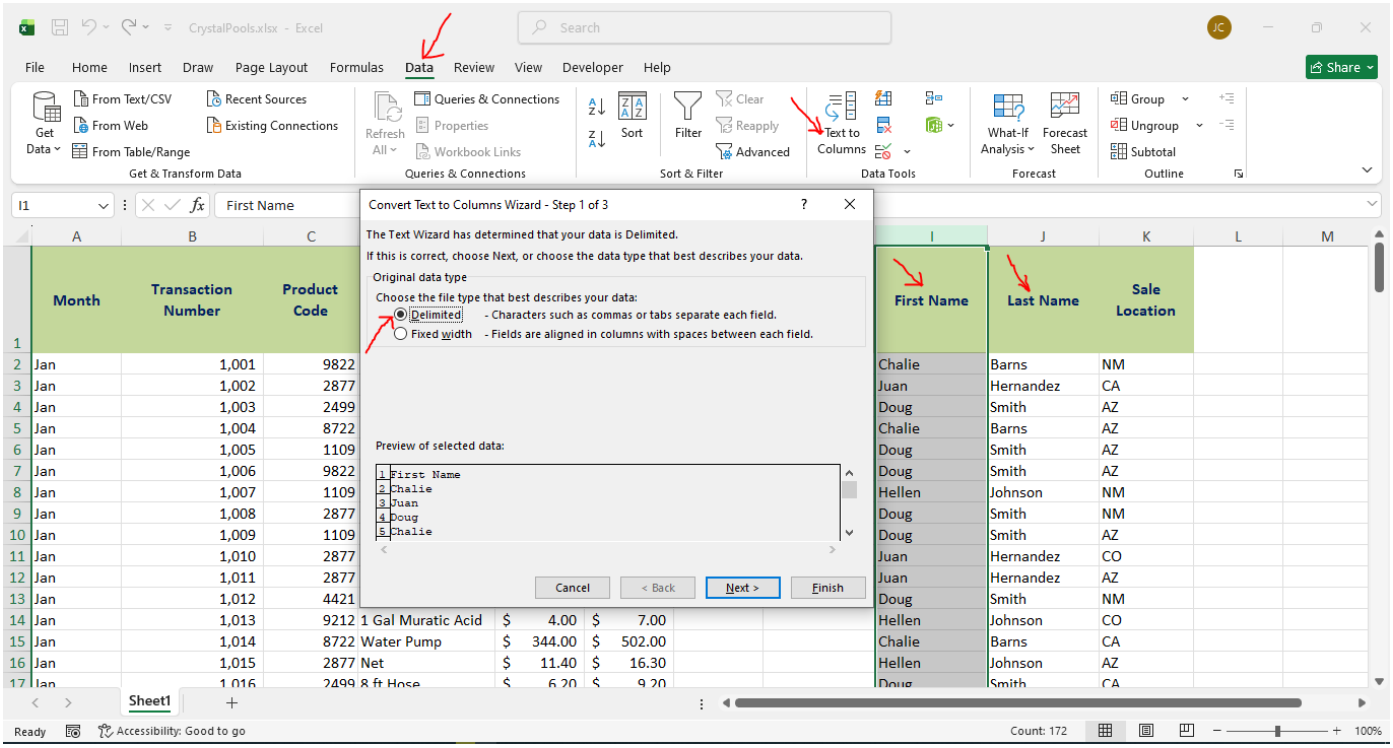

==========

Split the data using the LEFT function:

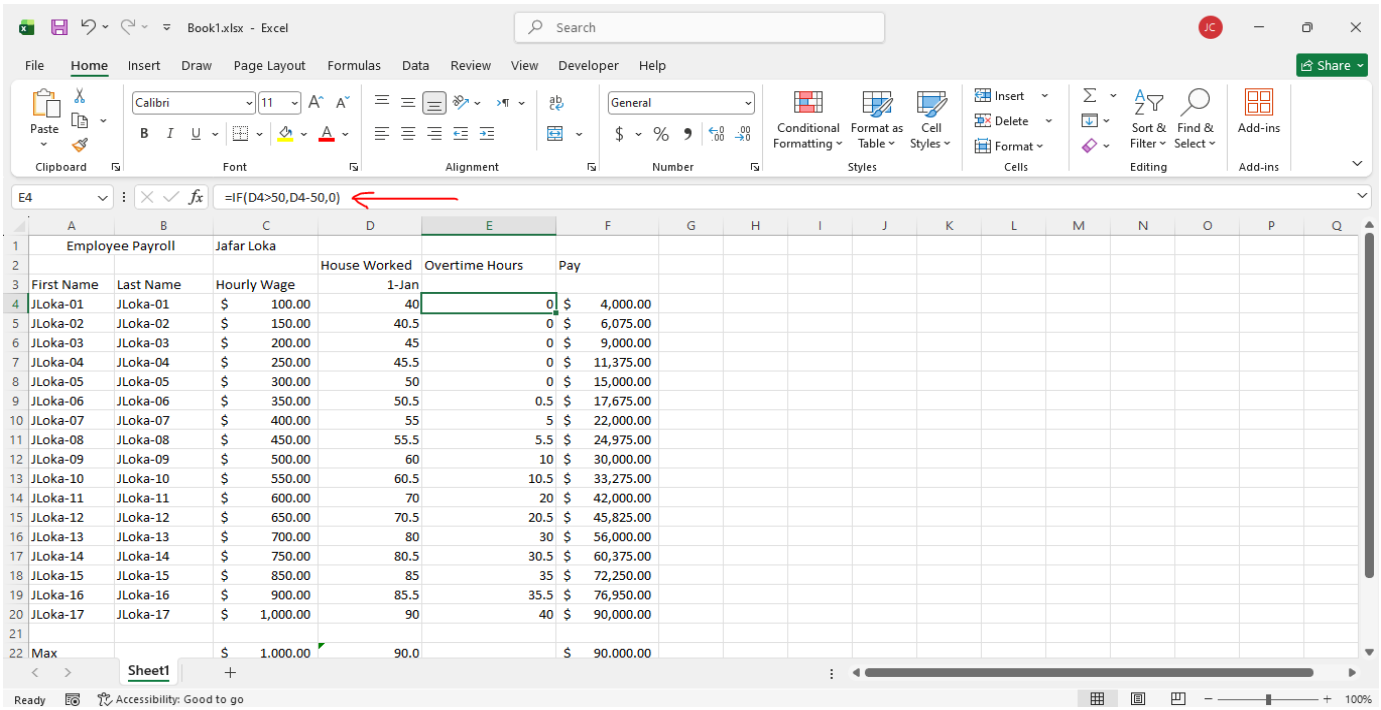

==========

To convert the Text data into columns (Generate Data) from the Data tab:

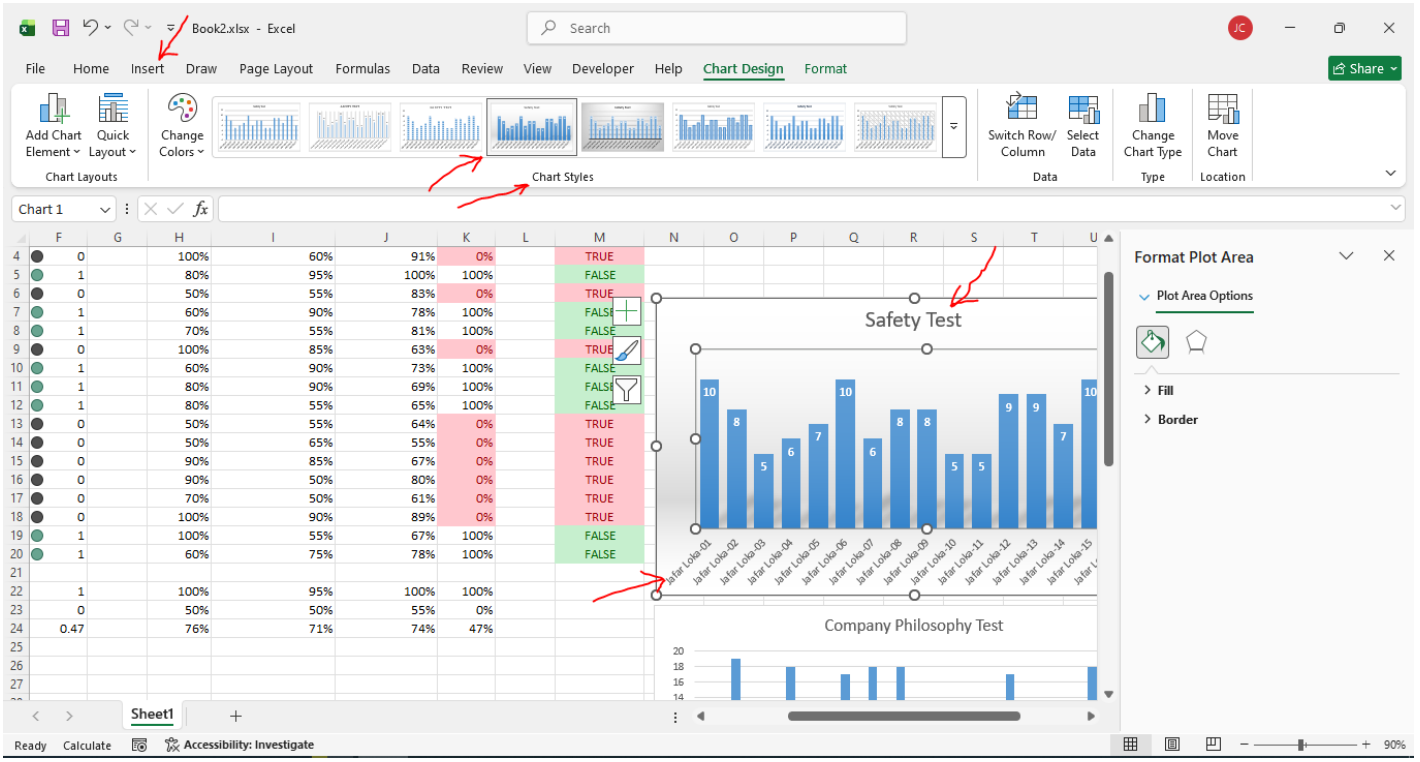

==========

Using the IF formula to set the right value for the cell:

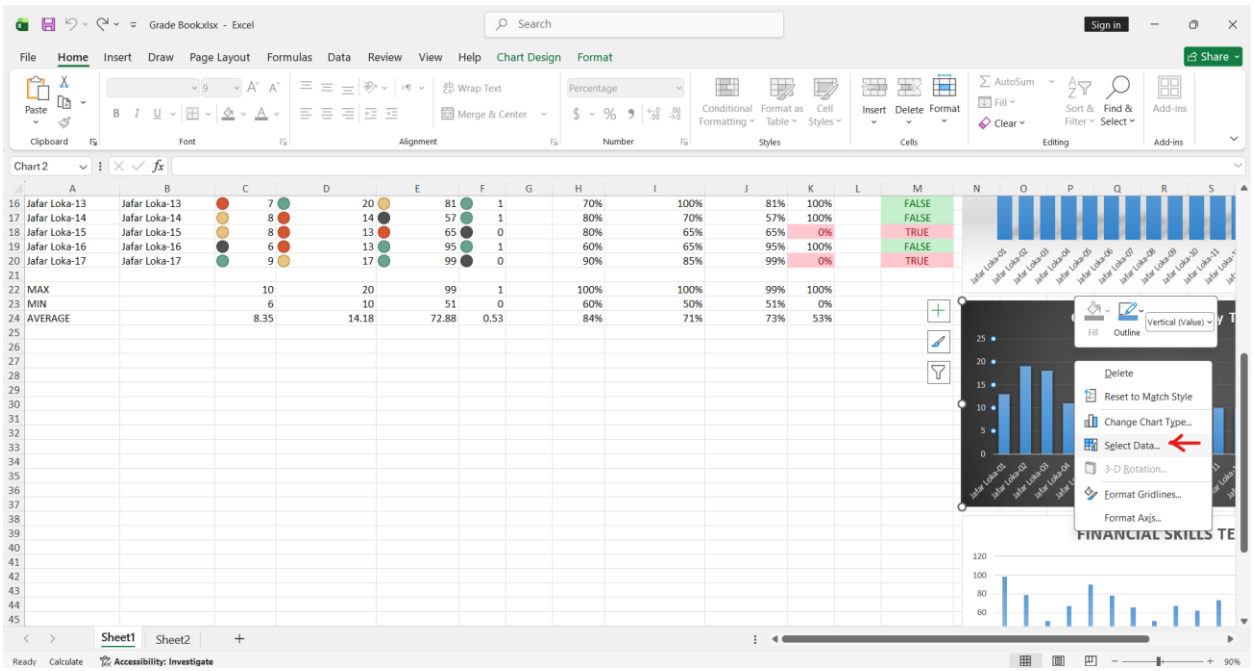

==========

To insert a chart and change the style from the Chart Design tab:

==========

Select the data for the chart so that we can define the horizontal and vertical axes.

==========
