Sheet1

Edit Accessibility: Good to go

The same issue for other formulas to use: **min**, **max**, **avg**, and **sum**

We can apply the formula using the rectangle of the cell:

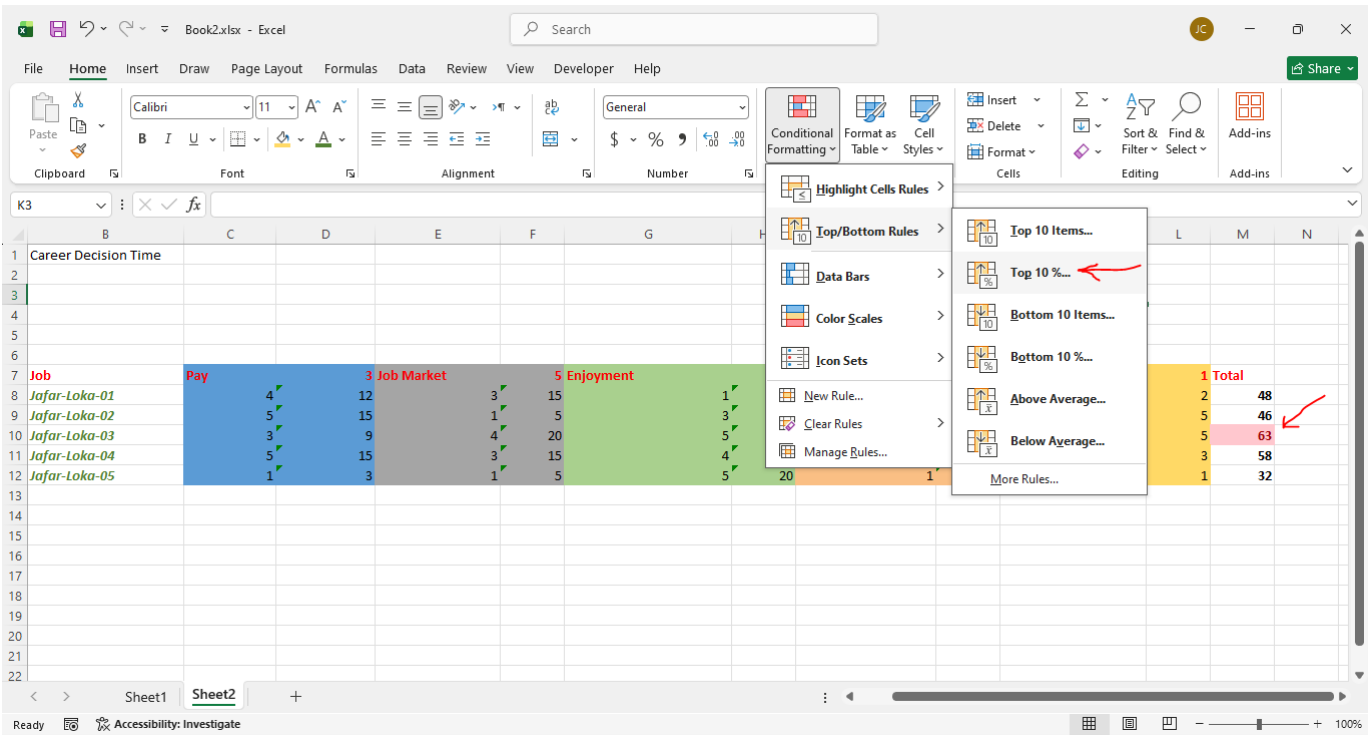

To apply the format on the cell:

Format Cells dialog box, Number tab selected. The 'Category' list shows 'General' selected. The 'Sample' box shows '90'. The spreadsheet data includes columns A through R and rows 13 through 25. A red arrow points to the 'Number' tab in the dialog box, and another red arrow points to the 'Number' button in the ribbon. The spreadsheet shows a table of data with columns for 'JLoka-10' through 'JLoka-17' and a 'Total' row. The 'Total' row shows values for 'Max', 'Min', 'Average', and 'Total'.

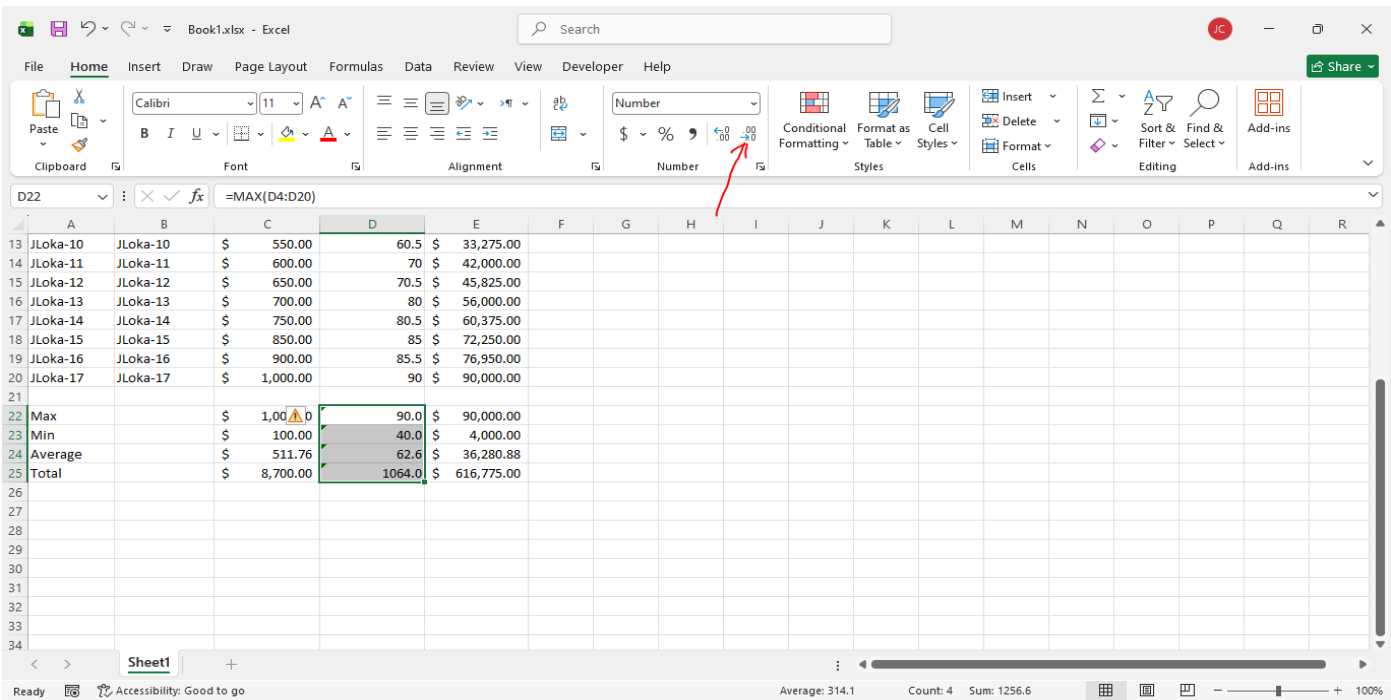

To use the conditional formatting with its formulas:

Conditional Formatting button highlighted in the ribbon. The spreadsheet data includes columns A through U and rows 4 through 20. The data is organized into a table with columns for 'Jafar Loka-01' through 'Jafar Loka-17' and a 'Total' row. The 'Total' row shows values for 'Max', 'Min', 'Average', and 'Total'. The spreadsheet also shows a table of data with columns for 'Jafar Loka-01' through 'Jafar Loka-17' and a 'Total' row. The 'Total' row shows values for 'Max', 'Min', 'Average', and 'Total'.

To create a conditional formatting using the Top 10%:

To increase or decrease the decimal point of a number:

To use the currency formatting:

The screenshot shows the Microsoft Excel interface with the 'Home' tab selected. The ribbon includes options for Font, Alignment, Number, Styles, Cells, and Editing. A red arrow points to the 'Accounting' button in the Number group, which is used to apply currency formatting. The formula bar shows the value '100' in cell C4. The worksheet contains a table titled 'Employee Payroll' with columns for First Name, Last Name, Hourly Wage, House Worked, and Pay. The 'Hourly Wage' column is highlighted with a red box, and the 'Pay' column is also highlighted. The status bar at the bottom shows 'Average: \$400.00 Count: 13 Sum: \$5,200.00'.

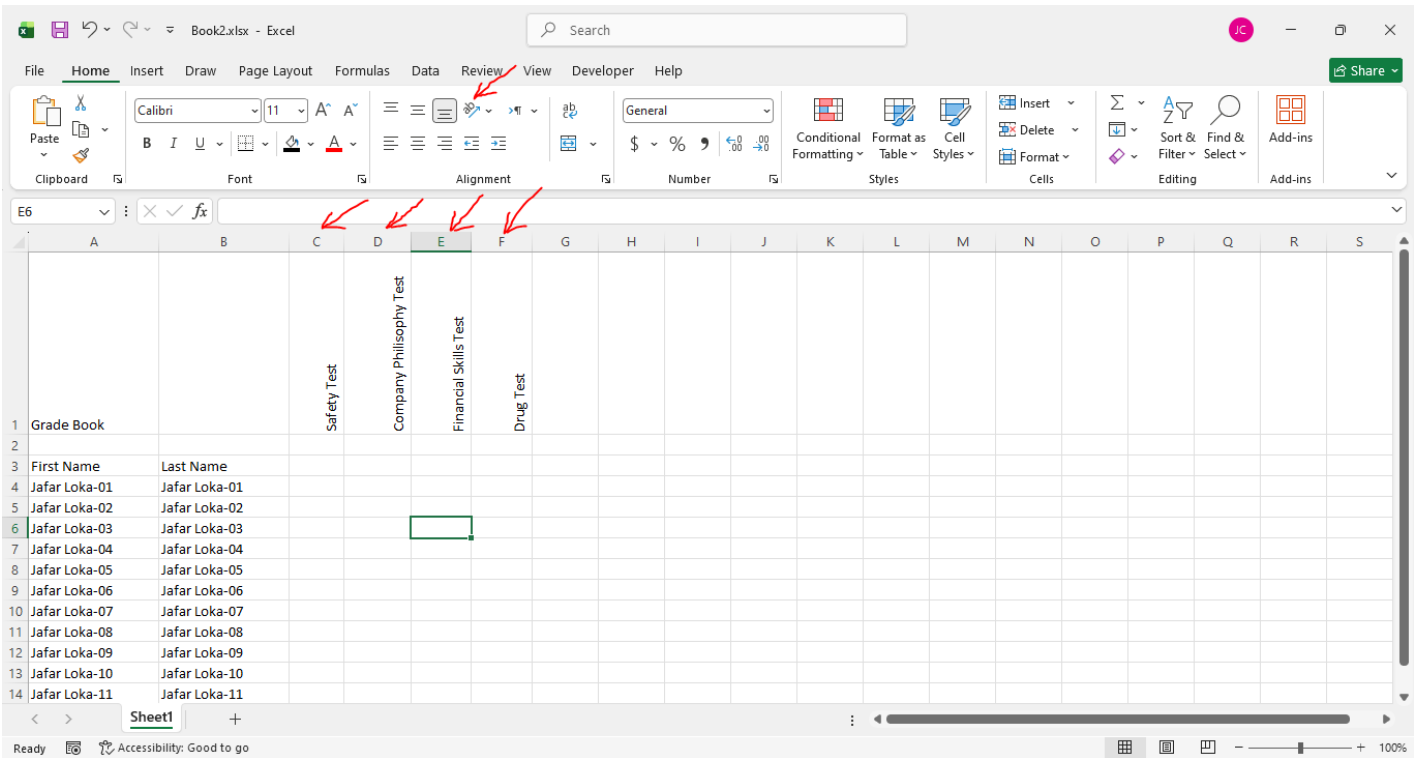

First Name	Last Name	Hourly Wage	House Worked	Pay
JLoka-01	JLoka-01	\$ 100.00	1-Jan	
JLoka-02	JLoka-02	\$ 150.00		
JLoka-03	JLoka-03	\$ 200.00		
JLoka-04	JLoka-04	\$ 250.00		
JLoka-05	JLoka-05	\$ 300.00		
JLoka-06	JLoka-06	\$ 350.00		
JLoka-07	JLoka-07	\$ 400.00		
JLoka-08	JLoka-08	\$ 450.00		
JLoka-09	JLoka-09	\$ 500.00		
JLoka-10	JLoka-10	\$ 550.00		
JLoka-11	JLoka-11	\$ 600.00		
JLoka-12	JLoka-12	\$ 650.00		
JLoka-13	JLoka-13	\$ 700.00		

Getting the data using the MID-Function:

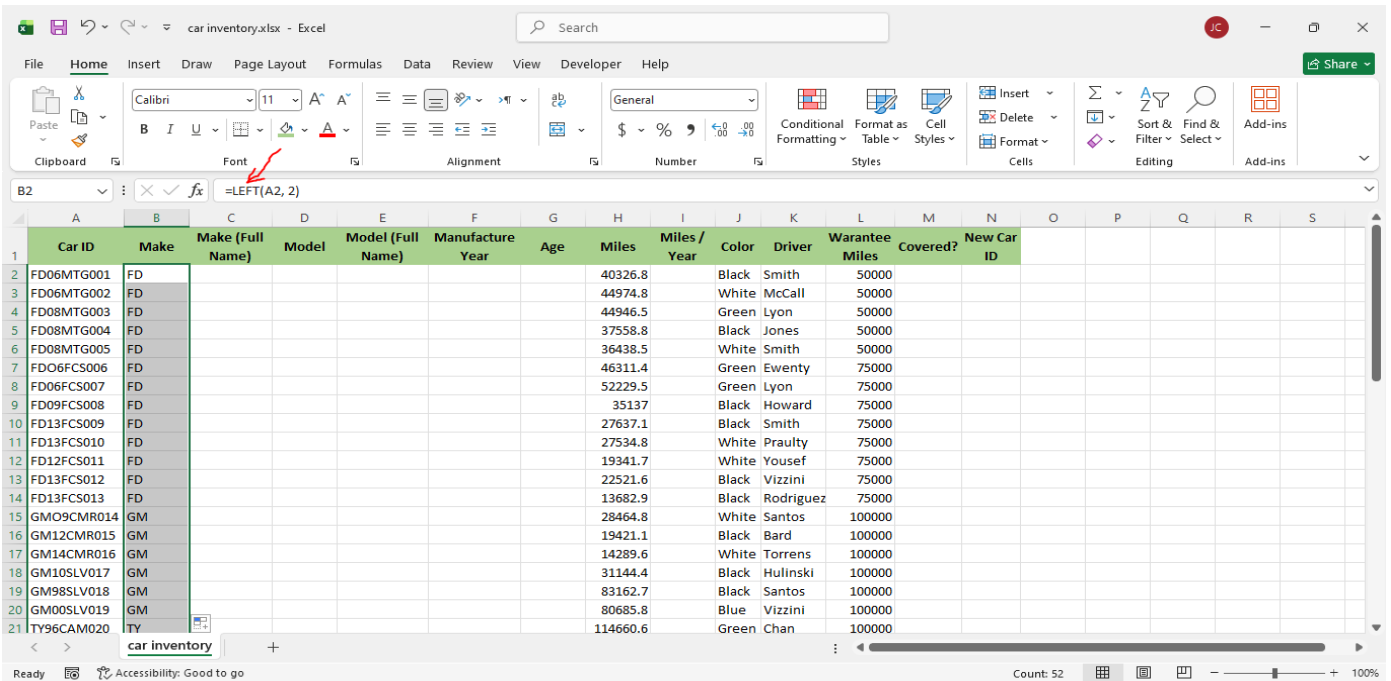

The screenshot shows the Microsoft Excel interface with the 'Home' tab selected. The ribbon includes options for Font, Alignment, Number, Styles, Cells, and Editing. A red arrow points to the 'Font' group, specifically to the 'MID' function. The formula bar shows the formula '=MID(A2, 5, 3)' in cell D2. The worksheet contains a table titled 'car inventory' with columns for Car ID, Make, Make (Full Name), Model, Model (Full Name), Manufacture Year, Age, Miles, Miles / Year, Color, Driver, Warantee Miles, Covered?, and New Car ID. The 'Make (Full Name)' column is highlighted with a red box, and the 'Model' column is also highlighted. The status bar at the bottom shows 'Count: 52'.

Car ID	Make	Make (Full Name)	Model	Model (Full Name)	Manufacture Year	Age	Miles	Miles / Year	Color	Driver	Warantee Miles	Covered?	New Car ID
FD06MTG001	FD	Ford	MTG				40326.8		Black	Smith	50000		
FD06MTG002	FD	Ford	MTG				44974.8		White	McCall	50000		
FD08MTG003	FD	Ford	MTG				44946.5		Green	Lyon	50000		
FD08MTG004	FD	Ford	MTG				37558.8		Black	Jones	50000		
FD08MTG005	FD	Ford	MTG				36438.5		White	Smith	50000		
FD06FCS006	FD	Ford	FCS				46311.4		Green	Ewenty	75000		
FD06FCS007	FD	Ford	FCS				52229.5		Green	Lyon	75000		
FD09FCS008	FD	Ford	FCS				35137		Black	Howard	75000		
FD13FCS009	FD	Ford	FCS				27637.1		Black	Smith	75000		
FD13FCS010	FD	Ford	FCS				27534.8		White	Prauly	75000		
FD12FCS011	FD	Ford	FCS				19341.7		White	Yousef	75000		
FD13FCS012	FD	Ford	FCS				22521.6		Black	Vizzini	75000		
FD13FCS013	FD	Ford	FCS				13682.9		Black	Rodriguez	75000		
GMO9CMR014	GM	General Motors	CMR				28464.8		White	Santos	100000		
GM12CMR015	GM	General Motors	CMR				19421.1		Black	Bard	100000		
GM14CMR016	GM	General Motors	CMR				14289.6		White	Torrens	100000		

To rotate the column values, we can use:

Split the data using the LEFT-Function:

To convert the Text data into columns (Generate Data) from the Data-Tab:

Convert Text to Columns Wizard - Step 1 of 3

The Text Wizard has determined that your data is Delimited.
If this is correct, choose Next, or choose the data type that best describes your data.

Original data type
Choose the file type that best describes your data:
☒ **Delimited** - Characters such as commas or tabs separate each field.
☐ Fixed width - Fields are aligned in columns with spaces between each field.

Preview of selected data:

1	First Name
2	Charlie
3	Juan
4	Doug
5	Charlie

Buttons: Cancel, < Back, Next >, Finish

Background Spreadsheet Data:

Month	Transaction Number	Product Code
Jan	1,001	9822
Jan	1,002	2877
Jan	1,003	2499
Jan	1,004	8722
Jan	1,005	1109
Jan	1,006	9822
Jan	1,007	1109
Jan	1,008	2877
Jan	1,009	1109
Jan	1,010	2877
Jan	1,011	2877
Jan	1,012	4421
